

Sarah's Top Five

	RPG operator chair with two arms	Water Pik, Inc. Densco Proflex Flexible Scaler Strip	Spectrum International Prometey Diode Laser	University of Pacific Moser	Intraoral Camera
When did you start using this product?	One year ago	Eight years ago after I heard a hygienist speak of it at a convention	About one year ago	15 years ago	13 years ago
If you could change anything about the item, what would it be?	The ability to adjust the arms more.	The bladed side would be clearly marked by a distinct color.	Self-coiling fiber, one that you could pull out and lock and then touch a button and it would recoil	If more companies would make it; currently I have only been able to get it from G. Hartzell & Son.	Make it cordless and be able to capture the image with a foot pedal
Why can you not live without this item?	I am not fatigued at the end of the day even if I have done all periodontal services all day!	Because the clean surface that you get after utilizing the scaler in the lower anteriors is unmatched!	The results that I am getting have been unmatched by any piece of equipment I have used for overall general healing.	It is the one "go to" instrument that I have that I can use it in all different situations and locations.	Because educating patients becomes easy with this tool, they cannot dispute the image.
